This is a subject

Dear Misters and Misses,

And again gain gain gain gain gain gain gain gain gain gain gain gain gain gain gain  
gain gain gain gain gain gain gain gain gain gain gain gain gain gain the same.

As you see, there is no visible difference, between a new line and a new paragraph, because we are inside the parbox. If you delete the parbox command and its finishing bracket, you will see the difference. Normally there is an indent on any new paragraph, like I created it here manually.

With love and roses,

signing man
